## The IAGS Mission: Energy Security

The Institute for the Analysis of Global Security (IAGS) is a non-profit organization which directs attention to the strong link between energy and security and provides a stage for public debate on the various avenues to strengthening the world's energy security.

RECOMMENDATIONS TO THE NATION ON OPENING THE TRANSPORTATION FUEL MARKET TO COMPETITION

United States  
Energy Security Council

*"The Obama administration would do itself and our economy a great service if it brought back the office of energy czar for the purpose of making this book's thesis a reality - and made its co-authors, Anne Korin and Gal Luft, co-czars."*  
The Washington Times

*"Remarkable collection spanning geopolitics, economy and technology. This timely and comprehensive volume is a one stop shop for anyone interested in one of the most important issues in international relations."*  
U.S. Senator Richard G. Lugar

*"A small masterpiece -- right on the money both strategically and technically, witty, far-sighted, and barbeques a number of sacred cows. Absolutely do not miss this."*  
R. James Woolsey, Former CIA Director

*"The book is going to become the Bible for everyone who is serious about energy and national security."*  
Robert C. McFarlane, Former U.S. National Security Advisor
